I bring 25 years of finance and insurance expertise, with a specific strength in fund accounting, NAV calculations, and regulatory reporting under multiple GAAP standards. I've spent the last decade working on complex accounting infrastructure—exactly what PE/RE funds demand.

What makes this fit concrete: I recently led a full accounting redesign for a €2B+ insurance portfolio, covering quarterly NAV reconciliation, multi-GAAP reporting (IFRS, local GAAP), and audit preparation across 40+ underlying entities. I own the entire reporting cycle—from data validation through stakeholder communication. That experience directly maps to your PERE fund accounting scope: I understand the bookkeeping rigor, the stakeholder coordination, and the pressure of accurate, timely delivery.

I've also worked extensively with investment managers and fund governance teams. I know how to translate technical accounting detail into clear reporting that serves decision-making, and I know how to push back on data quality when it matters.

There's one honest gap: I've been independent for five years, running my consulting practice full-time. This role is a contract position, which actually suits my situation well—I'm looking for a structured environment where I can contribute deep expertise without the overhead of business development. The client-site requirement isn't a problem; I'm based in the Paris region and can manage travel to Luxembourg regularly.

I'm ready to move fast on this. You can reach me at xro@xavier-robitaille.com or +33 6 64 89 09 43 to discuss how I can shore up your fund accounting team.
