

Principal Consultant (m/f/d) - Allianz Consulting - Finance & Transaction Services (FTS)

August 27, 2026

Re : De nouvelles offres d'emploi correspondent à vos préférences.

Allianz Consulting's Finance & Transaction Services team reworks Finance operating models across the Group, at the point where accounting, actuarial, risk and technology meet. That combination, delivered under executive scrutiny and against firm deadlines, is where I have built my career.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the custodian CACEIS. I also built the investment Data Warehouse there, defining the fields, table structure, and input and output controls.

Leading these programs runs through four years at SCOR, including two as chief transformation officer of the investment function, and continues as senior programme director for Clearwater, where I ran several parallel R2R SaaS implementations, with monthly executive-level steering committees and consolidated tracking of deliverables, milestones and resources on Monday.com, for clients including the Luxembourg-based Luxempart. On the technical side, I completed the full examination track of the Centre d'Études Actuarielles (2004), which gives me real footing when working alongside actuarial teams rather than around them.

Certified in Generative AI Primer (Vanderbilt, 2026) and GenAI for Account Executives (Yale, 2026), I now run nearly all of my own consulting activity through AI agents under Claude or GPT. That is the kind of adoption this role expects consultants to bring into client conversations, not just describe.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to the FTS team's current Finance Transformation programs.

Best regards,

Xavier Robitaille
