Letter of motivation

Dear EPAM Hiring Team,

I bring 25 years of deep financial services experience—every single role in banking, insurance, or finance transformation. I've delivered large-scale programs across regulatory compliance, core banking redesigns, and payment modernization initiatives. I understand the domain constraints, not from theory, but from 15+ years of hands-on delivery in heavily regulated environments.

In my last two major mandates as interim manager, I led the redesign of a €200M+ insurance operating model across 12 countries (governance, process, technology alignment), and built the PMO infrastructure for a critical regulatory reporting transformation touching 300+ stakeholders across finance, risk, and operations. Both landed on time, both added measurable operational and compliance value. I work fluently in MiFID II, DORA, and regulatory risk frameworks because they've been embedded in my projects, not because I read about them.

What matters here: I know how to thread the needle between business velocity, stakeholder clarity, and regulatory rigor. I've mentored teams, built governance structures that actually work (not just theoretically), and managed budgets and resource trade-offs under real pressure. I'm equally comfortable in waterfall, agile, or hybrid models—I pick based on what the program actually needs, not doctrine.

One honest note: I've worked as an independent consultant the last five years (Expert Zone Advisory SAS). I'm open to a CDI in the right fit, and this role feels like it. I'm ready to move to Frankfurt or work hybrid in a way that fits your setup.

I'd welcome a conversation about how my delivery track record maps to your financial services pipeline.

Best regards,

Xavier Robitaille
