### **Re : PMO senior (m/f/d)**

Large-scale transformation programmes at financial market infrastructure organisations live or die on governance discipline: clear ownership, accurate reporting, and alignment between workstreams that often pull in different directions. That is the specific challenge this role addresses, and it matches the type of delivery work I have run for the past 25 years in insurance and in finance.

At Clearwater, as senior programme director, I piloted several parallel implementations of an R to R SaaS solution, with monthly sponsor committees at executive level and consolidated tracking of deliverables, milestones, and resources on a dedicated tool (Monday.com), including for a Luxembourg client, Luxempart. That work required the same discipline this role calls for: keeping multiple stakeholders aligned on priorities and dependencies while reporting progress to senior management without noise or delay.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting for 350 billion euros in assets, running a SimCorp Dimension implementation from design to go-live in 18 months. At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the custodian CACEIS. Both programmes demanded the same governance rigour this role is built around: tracking risk, escalating critical items, and keeping steering committees moving toward decisions rather than circling them.

A leading market infrastructure organisation is exactly the kind of environment where this experience applies best: high visibility, multiple stakeholders, and no room for ambiguity in reporting.

I operate as an independent consultant today. That said, a permanent role in Paris is entirely something I would consider, either directly or after an initial engagement period, given the scope of this position.

I would be happy to discuss how this experience applies to the programme you are running.

Best regards,

Xavier Robitaille
