Re : Interim Reporting Manager

A six-month year-end transition in the London Market calls for someone who can run quarterly IFRS 17 group reporting and close the books under FRS 102/103 without a ramp-up period. That combination, group reporting plus statutory accounts plus Solvency UK returns, is exactly where I've spent the last two decades.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That work sits directly next to what Solvency UK returns demand: accurate technical provisions data feeding regulatory submissions under real deadline pressure, coordinated with actuarial teams rather than worked around them. At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, coordination with the custodian CACEIS. The same discipline (methodology first, then controls, then production) applies to an IFRS 17 quarterly cycle under a CFO who needs the numbers right the first time. Four years at SCOR, two of them as chief transformation officer of the investment function, also mean I've sat inside a reinsurer's reporting function at group level, not just advised one from outside.

Hybrid working is how I've run things for years. My last engagement, directing a multi-country SaaS implementation for Clearwater Analytics, was managed entirely through monthly steering committees at executive level and consolidated tracking on Monday.com, with teams split across locations. London Market reporting under hybrid conditions is not a new constraint for me.

As a contractor who is a non-UK Tax resident, based overseas, IR35 does not apply to me.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience maps onto the quarterly reporting cycle you need covered.

Best regards,

Xavier Robitaille
