Dear Hiring Manager,

I'm writing to express my interest in the Interim Finance Manager role at Arthur Recruitment's insurance client.

I'm a hands-on finance professional with 25 years in insurance and financial services—every single role has been in this sector. I've spent the last decade delivering finance transformation and management reporting in complex insurance environments, working closely with CFOs and finance controllers on exactly the kind of high-pressure project work your client is undertaking. I understand the rhythm of management accounts, audit coordination, statutory reporting, and the operational discipline required when a finance team is stretched.

What matters here: I've built month-end reporting packs and managed financial controls through major organisational changes. I've supported external audits on statutory accounts and led process redesign work that tightened reporting timelines and control effectiveness. I'm fluent in Excel, data analysis, and pulling usable intelligence from systems—the daily toolkit you need.

I'm ACCA-qualified and have worked extensively across insurance accounting, risk reporting, and reinsurance environments. More recently, I've been consulting as an interim and senior advisor on finance transformation and PMO delivery, which means I'm comfortable with fixed-term, project-focused engagement where you own outcomes and manage your own time.

The honest trade-off: I'm based in France (near Paris, +33 contact) and would need to work this hybrid from London. If your client is open to a strong remote-first arrangement with periodic in-office presence, or if you're considering a candidate who can commit to a structured London schedule, I'm genuinely interested in exploring this.

I'm available to discuss how I can add value to your team. You can reach me at xro@xavier-robitaille.com or via Calendly for a brief call.

Best regards,  
Xavier Robitaille
