Re : Fund Operations Specialist (Backoffice - FA/CUS) - Limited to 24 months (f/m/d)

Overseeing fund accounting and custody providers across a European footprint while keeping SLAs, KPIs, and escalation processes tight enough to survive a due diligence review is where governance work either holds up or falls apart. That's the part of this role worth engaging with directly.

My work has sat at that intersection for most of 25 years. At CNP, I rebuilt investment accounting production under Solvency II constraints across 350 billion euros in assets, delivered in 18 months, on time, with reconciled data ready for audit at every milestone. That kind of deliverable only works if the review boards and provider negotiations behind it are disciplined, not improvised. I've also run SimCorp Dimension and Clearwater Analytics implementations end to end, from design through production cutover, which means I understand where fund accounting and custody data actually breaks, not just where the SLA says it shouldn't. On the migration side, I've handled data cutovers and interface bascule projects with UAT and CDC work, the kind of ad hoc, project-driven support this team needs when a new process gets layered onto existing operations.

My EU retail fund exposure comes from the investment accounting and reporting side rather than direct fund oversight roles, so that's a gap worth naming rather than papering over.

Hybrid work is standard practice for me. My last engagement, with Clearwater, ran fully on remote collaboration tools without friction. Worth a call to see if the fit works both ways.
