Re : Manager Invest - Business Transformation - Financial Services

EY's Invest practice sits at a specific intersection: asset management, private banking and wealth management clients that need strategic ambitions turned into working operating models, under MiFID and broader regulatory pressure, often with a digital transformation running in parallel. That combination of regulatory depth and execution discipline is exactly where I've spent the last 25 years in insurance and in finance.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That program required the same translation this role calls for: strategic and regulatory requirements turned into a concrete delivery plan, with senior stakeholders across finance, risk and IT aligned on milestones.

At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, coordination with the depository CACEIS. I also built a Data Warehouse for investments there, defining fields, table structure and input/output controls, the kind of front-to-back process work that sits underneath any advisory tooling or investment platform transformation. More recently, as senior programme director at Clearwater, I ran several parallel implementations of a SaaS R to R solution, with monthly sponsor committees at executive level and consolidated tracking of deliverables, milestones and resources on Monday.com, including a Luxembourg client, Luxempart.

I completed the full examination track of the Centre d'Études Actuarielles in 2004, which gives me a technical grounding that carries into regulatory and investment product discussions at the level this role requires. Certified in Generative AI Primer (Vanderbilt, 2026) and GenAI for Account Executives (Yale, 2026), I now run most of my entrepreneurial activity through AI agents under Claude or GPT, which shapes how I think about digital delivery for clients too.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to the Invest practice's current transformation programs.

Best regards,
