Dear Hiring Manager,

I'm writing to express my interest in the IFRS 17 Reporting Accountant role at Arthur Recruitment's London Market client.

With 25 years in insurance and finance, I've spent the last decade leading regulatory reporting transformations and BAU transitions for complex organisations. I understand the specific challenge here: moving IFRS 17 from implementation phase into stable operations while building credible controls and analytics that internal and external stakeholders can rely on.

I've delivered exactly this work. Most recently, I managed a Solvency II reporting redesign for a mid-market insurer—designing process maps from scratch, embedding controls, training finance teams, and supporting external audit sign-off. Before that, I led quarterly UK GAAP and regulatory reporting cycles while partnering with actuarial teams to resolve complex variance investigations and improve data quality. I'm comfortable with reconciliations, commentary preparation, and the iterative work of building management information that actually gets used.

I hold ACA qualification and have worked across Lloyd's, London Market, and broader insurance sector roles. I'm equally fluent in Excel analytics and cross-functional stakeholder work—the skills that matter when Finance, Actuarial, and IT teams need to align quickly.

I should be transparent: I'm currently independent and structured as a consultant. I've taken fixed-term contracts before and work well in structured project environments with clear deliverables and timelines. The 12-month scope and hybrid arrangement suit my situation.

I'm ready to move into this role with minimal onboarding friction. I'd welcome a conversation about how my experience maps to your client's specific priorities.

Best regards,

Xavier Robitaille
