Re : Vice President Accounting, Luxembourg Controller (12-Month Fixed-Term Contract)

BNY's MFM Luxembourg entity reports under Lux GAAP, IFRS and US GAAP at once, across a management company and its branches, with month-end close quality resting on how well the regional shared services centre's output gets reviewed before it reaches senior management and the Boards. That is the kind of multi-standard, multi-stakeholder control environment where I add the most value.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That work sat at the same intersection this role occupies: technical accounting judgment feeding regulatory and management reporting under real deadline pressure. At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting entries, UAT, coordination with the depository CACEIS, while managing a 16-person accounting team responsible for the technical accounting production. I also built a securities Data Warehouse there, including field definitions, table structure, and input/output controls, which is the same discipline behind clean statutory and regulatory filings. I completed the full examination track of the Centre d'Études Actuarielles in 2004, which gives me the technical depth to sit across accounting, actuarial and finance conversations without losing precision.

Luxembourg's regulatory framework and CSSF requirements are close to territory I know well from French and international insurance and finance environments, and a fixed-term controller mandate at BNY's scale is exactly the kind of assignment I look for.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period. Hybrid and remote work are part of how I already deliver: at Clearwater, as senior programme director, I ran several parallel SaaS R2R implementations with monthly sponsor committees at senior management level, coordinating deliverables, milestones and resources remotely through Monday.com, including for a Luxembourg client, Luxempart.

I would be happy to discuss how this experience maps onto the MFM Luxembourg Controller mandate.

Best regards,
