Re : Senior Fund Operations Manager

Building a new fund operations platform in Luxembourg from the ground up, with full ownership of service providers, governance and investor reporting, is the kind of standalone mandate where 25 years of experience in insurance and in finance apply directly.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That mandate meant building the operating model and controls around a new platform from scratch, coordinating finance, actuarial and IT stakeholders against a fixed deadline, the same discipline a standalone Luxembourg entity requires from day one.

At Coface, IFRS 9 rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and direct coordination with the depositary, CACEIS. That work, overseeing accounting, controls and regulatory deliverables produced by an external provider, corresponds directly to the oversight of auditors, depositaries and tax advisers this role calls for.

As senior programme director at Clearwater, I ran several parallel implementations of an R to R SaaS solution, including for the Luxembourg-based Luxempart, with monthly sponsor committees at senior management level and consolidated tracking of deliverables, milestones and resources on a dedicated tool (Monday.com). That work was run largely remotely, across teams and providers in different locations, which is how I operate today and how I would manage a platform built from the ground up with stakeholders spread across Luxembourg and abroad.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to building your fund operations platform from the ground up.

Best regards,

Xavier Robitaille
