

AXA Group Operations

July 17, 2026

Re : Consolidation Expert

Building a Consolidation function that covers every AXA Group Operations entity, while keeping statutory-to-IFRS restatements audit-ready under Group deadlines, is not a routine accounting role. It sits at the intersection of technical rigor, tight timelines, and coordination across Controlling, Accounting, and Group teams.

At CNP, I rebuilt the investment accounting production chain under Solvency II constraints: 350 billion euros in assets under management, delivered in 18 months, on schedule. That work required constant translation between statutory figures and prudential/IFRS requirements, exactly the kind of restatement logic your quarterly consolidated figures depend on. My IFRS 9 and IFRS 17 background (categorization, ECL, amortized cost, ASD) gives me the technical footing to explain statutory-to-IFRS gaps with a clean audit trail rather than approximations. I've also led closing process redesigns aimed at fast-close and reconciliation discipline, and handled data migration and apurement projects where UAT and traceability were non-negotiable.

One real gap: I haven't worked directly with SAP BFC Financial Consolidation (Magnitude) or submitted figures to a Group consolidation team from the subsidiary side. My consolidation exposure comes from the investment and prudential accounting side, not from a Group reporting seat.

Happy to walk through specifics on a call if that's useful.
