Re : Insurance Financial and Reporting Manager (M/F)

A leading international insurance group operating across multiple European jurisdictions needs someone who can run the Luxembourg entity's financial operations end to end: LUX GAAP accuracy, IFRS alignment, closing cycles, and the coordination with auditors, regulators and tax advisors that keeps a multi-branch structure compliant. That combination, technical accounting depth plus regulatory coordination, is where I've spent most of my career.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That project required the same discipline this role calls for: closing packs that regulators and auditors can rely on, delivered on fixed deadlines, with no room for ambiguity in the numbers.

At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the depository CACEIS. I also built the investment Data Warehouse there, defining the fields, table structure, and input/output controls that fed the reporting. Both required the same back-and-forth with external stakeholders that this role asks for between finance, auditors and supervisory authorities.

Reporting to a Head of Finance, coordinating with group finance on consolidation, supervising a local team: this matches how I've operated across an international group before, including four years at SCOR, two of them as chief transformation officer of the investment function.

Hybrid work is how I've operated for years now. My last engagement, as senior programme director at Clearwater, ran across parallel SaaS implementations with monthly sponsor committees at general management level, remote delivery, and consolidated tracking of deliverables, milestones and resources on a dedicated tool (Monday.com), for clients including Luxempart in Luxembourg.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to the Luxembourg entity's reporting cycle.

Best regards,

Xavier Robitaille
