Re : Senior Manager (Asset & Wealth Management Consulting) - Paris

Rebuilding operating models for asset managers and private banks while integrating M&A platforms, running Middle and Back Office transformation programmes, and keeping pace with Solvency II and IFRS 9/17 reporting demands is exactly the kind of engagement mix Alpha's Asset and Wealth Management practice takes on for its 1,200+ clients.

At CNP, I rebuilt the investment accounting production chain under Solvency II constraints, covering 350bn EUR in assets under management, and delivered it in 18 months, on time. That work meant redesigning sub-ledger accounting schemes, running UAT campaigns, and clearing legacy suspense accounts during a GL migration, the same kind of process and data discipline this role expects around Middle/Back Office outsourcing. I've also taken SimCorp Dimension and Clearwater Analytics implementations from design through to production, managing IT and Finance stakeholders who rarely agree on priorities, which maps directly onto the TOM and IT solutions work described in the role. Across these missions the constant has been governance under pressure: cadence, risk tracking, and keeping sponsors informed without slowing delivery.

My depth sits on the investment accounting and regulatory side rather than front-office distribution or CRM, so that part of the scope would be new ground for me.

I currently work as an independent consultant but I'm open to a permanent role in Paris, whether that starts directly or follows an initial mission period. Happy to walk through specifics on a call.
