Re : Financial Fund Reporting Project Manager Consultant

Taleo Consulting is running the Finance and Reporting workstream of a fund merger across Luxembourg, France and Ireland, with financial reporting migration, data quality, and regulatory compliance to keep aligned across three jurisdictions through UAT and go-live. That kind of multi-country coordination under a fixed migration timeline is exactly where I want to put 25 years of experience in insurance and in finance to work.

At Clearwater, as senior programme director, I ran parallel implementations of a SaaS R to R solution, including for the Luxembourg client Luxempart, with monthly sponsor committees at senior management level and consolidated tracking of deliverables, milestones, and resources on Monday.com. That governance structure, action logs, decision records, risk tracking across workstreams, maps directly onto what a fund merger workstream needs from planning through UAT to production go-live. At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. At Coface, I rolled out IFRS 9 over four years in stages: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the depositary CACEIS, alongside a Data Warehouse I built for investment data (fields, table structure, input and output controls). That combination of fund accounting fluency (French GAAP, IFRS), migration discipline, and stakeholder management across Finance, Accounting, and IT teams is what this role calls for.

Remote and hybrid delivery is a normal working mode for me. My last engagement at Clearwater ran across countries and time zones with the same rigor as an on-site programme.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to the fund merger workstream.

Best regards,

Xavier Robitaille
