I bring 25 years of insurance and finance expertise to roles where technical depth, regulatory complexity, and delivery discipline matter most. I've spent my entire career at the intersection of finance transformation, PMO governance, and risk—the exact terrain where most organizations struggle to find senior practitioners who can actually execute.

My recent work includes leading a regulatory reporting redesign for a €2B+ insurance group, where I restructured their entire control framework and cut month-end closing from 15 to 8 days. Before that, I managed a cross-functional program rebuilding the finance operating model for a mid-market insurer —aligning actuaries, controllers, and IT around a single source of truth for reporting. Both delivered under compressed timelines with measurable impact on accuracy and speed.

I should be direct about the trade-off: I'm structured as an independent consultant through Expert Zone Advisory SAS, not looking for traditional employment. That means I move fast, own outcomes, and don't require the overhead of onboarding into corporate machinery. It also means if your need is genuinely high-stakes and time-bound, I can mobilize faster than most.

Let's talk about what you're solving for. A brief call will tell us quickly whether this is a fit.
