

Senior Manager – InsuranceTransformation

August 23, 2026

Re : De nouvelles offres d'emploi correspondent à vos préférences.

KPMG's Insurance Transformation team leads high-impact change across underwriting, claims, policy administration and regulatory reporting for insurers, with critical initiatives that demand both delivery discipline and genuine trust at C-level. That combination, deep technical grounding in insurance and in finance plus program leadership at the top of the house, is exactly where I've built my career.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, coordination with the depository CACEIS, alongside building an investment Data Warehouse from scratch (fields, table structure, input and output controls). More recently, as senior programme director at Clearwater, I ran several parallel SaaS R2R implementations, including for Luxempart, with monthly steering committees at executive level and consolidated tracking of deliverables, milestones and resources on Monday.com, entirely in a distributed, remote-first delivery model I'm well used to running.

I completed the full examination track of the Centre d'Études Actuarielles in 2004, and four years at SCOR, two of them as chief transformation officer of the investment function, gave me the regulatory and organizational grounding this role calls for. Certified Generative AI Primer (Vanderbilt, 2026) and GenAI for Account Executives (Yale, 2026), I now automate nearly all of my entrepreneurial activity through AI agents under Claude or GPT, which speaks directly to embedding automation into transformation delivery.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to KPMG's core insurance transformation mandates.

Best regards,

Xavier Robitaille
