Dear Hiring Manager,

I bring 25 years of insurance finance experience directly aligned with this Syndicate Reporting Manager role. My track record centres on exactly what you need: closing complex multi-currency ledgers on time, delivering regulatory returns that pass external audit, and building the control infrastructure that keeps reporting clean under pressure.

Most relevant: I spent six years managing quarterly close cycles for a Lloyd's-admitted insurer, where I owned the P&L and balance sheet reconciliations across three syndicates operating in GBP, USD, and EUR. I redesigned their close timetable, cut closure time by 18 days, and implemented a controlled ledger population process that eliminated prior-year audit adjustments. I'm equally comfortable with Sun and manual ledger structures. I've completed Lloyd's regulatory returns (PIU, annual accounts, solvency submissions) and worked closely with external auditors—I understand the submission deadlines and the detail regulators expect.

I'm qualified by experience (not formally ACA/ACCA, which I know is your stated preference). However, my depth in insurance accounting standards, current regulatory environment (both GAAP and Solvency II), and proven ability to deliver under deadline typically compensates. I've filled similar roles at manager and senior manager level across interim and permanent placements.

The honest gap: you're hiring for a London market permanent role. I'm based in France and have worked primarily as a senior consultant. If flexibility on location or contract structure is possible, I'd be a strong fit. If you require a strict permanent, London-based profile, I understand.

I'd welcome a call to discuss how my experience translates to your syndicate's specific close and reporting needs.

Best regards,

Xavier Robitaille
