Re : Fund Operations Specialist (Backoffice - FA/CUS) - Limited to 24 months (f/m/d)

Running oversight on fund accounting and custody providers while keeping SLAs, KPIs and escalation processes disciplined enough to survive an audit is a different job than production itself. Allianz Global Investors is building that governance layer in Niederanven, and it needs someone who has already done the reconciliation and provider work end to end.

I've implemented SimCorp Dimension and Clearwater Analytics for investment accounting and custody reconciliation, from the cahier des charges through UAT to production cutover, coordinating fund accountants, custodians and IT so the data handed to auditors reconciled the first time. On migration projects I've cleared suspense accounts and rebuilt OD postings through VBA when interfaces changed mid-stream, exactly the kind of reconciled documentation due diligence and audit teams ask for. Across programs spanning Finance, Actuarial, IT and Risk, I've run the governance side too: scoping, milestone tracking, and negotiating with providers when service levels slipped, the same discipline this role expects from review boards.

I haven't worked the EU retail fund distribution side directly. My back-office and reconciliation work sits on the institutional insurance and asset management side, not retail fund ranges.

My last mission ran on Clearwater Analytics in a fully hybrid, cross-border setup, so remote provider oversight across time zones isn't new territory. Worth a call to see where the overlap is strongest?
