Re : Head of Finance (M/F)

Leading an insurance group's Luxembourg entity through its full finance, regulatory and audit cycle calls for someone who has already run that machinery end to end, under group and supervisory scrutiny at the same time.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That work sat exactly at the intersection this role occupies: LUX GAAP and group IFRS consolidation, general ledger integrity, and the regulatory filings supervisory authorities expect on time and without rework. At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the depositary bank CACEIS, while also building a Data Warehouse for investments (field design, table structure, input and output controls). Coordinating auditors, tax advisors and a custodian bank across a multi-year programme is close to what this position asks for on the audit and regulatory side.

As senior programme director at Clearwater, I ran several SaaS R-to-R implementations in parallel, with monthly sponsor committees at senior management level and consolidated tracking of deliverables, milestones and resources on Monday.com, including a Luxembourg-based client, Luxempart. That mission ran fully remote and hybrid, which is also how I work today: I am used to running closing cycles, reporting packs and stakeholder coordination at distance, with the same discipline as on site.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to the Luxembourg entity's closing and regulatory cycle.

Best regards,

Xavier Robitaille
