

BNP Paribas Asset Management

October 2, 2026

Re : Fund Controller H/F

BNP Paribas Asset Management operates one of the largest alternatives platforms in Europe, close to €300bn across real estate, infrastructure, alternative credit, and private equity. Valuation, accounting oversight, and regulatory reporting at that scale demand tight reconciliation discipline across systems and counterparties, which is exactly where I've spent the last two decades.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That work covered the same kind of multi-system reconciliation this role calls for, between valuation engines, accounting records, and custodian data. At Coface, IFRS 9 rolled out in stages over four years: successive POCs, ECL methodology, accounting schemas, UAT, coordination with the custodian CACEIS. I also built a Data Warehouse for investments there, covering field definitions, table structure, and input/output controls, which maps directly onto the eFront/Simcorp/Vidrio reconciliation work described in this role. As senior programme director at Clearwater, I ran several parallel implementations of an R to R SaaS solution, with monthly sponsor committees at executive level and consolidated tracking of deliverables, milestones, and resources on Monday.com, including the Luxembourg client Luxempart.

The regulatory reporting layer here (AIFM, Solvency) sits on the same ground I've worked across CNP and Coface: the Solvency II investment reporting deliverables (ORSA, RSR/SFCR, QRT) and IFRS 9 ECL frameworks. BNPP AM's scale and its position in long-term savings for insurers and pension funds make this a natural fit for that experience.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this reconciliation and reporting experience applies to the Investment Support team's current priorities.

Best regards,

Xavier Robitaille
