I bring 25 years of Finance and Insurance transformation expertise—exactly the depth MLAdvisory needs in a Manager role. My career has been built in the intersection you value most: technical rigor, regulatory complexity, delivery discipline, and the ability to align Finance, Risk, and IT stakeholders under real pressure.

What sets me apart is operational delivery, not just strategy. I've led full-scale finance transformations: redesigning closing processes for a €15B+ insurance group (cut month-end cycle by 40%, embedded controls framework), architecting regulatory reporting platforms compliant with Solvency II and IFRS 17, and managing cross-functional PMO structures where clarity and execution cadence drive results. I've worked directly with CFOs and Risk heads—the conversations you'll be having at your clients. I know how to translate technical requirements into business outcomes without losing either rigor or stakeholder buy-in.

I'm coming from a freelance/boutique background, which means I operate like a consultant already: client-focused, deadline-driven, accustomed to working across silos and bringing external perspective. The transition to your structured team environment is straightforward—I'm looking for the stability and collaborative depth of a house where I can build expertise ownership and grow through the community you're building.

I'm ready to move into this role immediately and contribute from day one on your Finance-Risque transformation mandates.

Let's talk. I'm available at +33 6 64 89 09 43 or xro@xavier-robitaille.com.
