EXECUTIVE SUMMARY

- Senior consultant and programme manager specialised in **investment accounting** transformation, **asset management platform** implementation and **front-to-back operating model** design. 25+ years of experience across insurance, reinsurance and asset management, combining business expertise, technical accounting depth and hands-on delivery leadership.
- Platform expertise: **SimCorp Dimension** (Lead Business Owner at CNP Assurances — €350bn AUM — and Implementation PM at SCOR Investment Partners — €20bn AUM — cumulative 8+ years); **Clearwater Analytics** (current Senior Programme Manager — CW CORE, OMS/Jump, LPx — €11bn AUM); **Bloomberg** (TSOX, Data License); SAP S/4HANA; SAS.
- Typical engagements: **OMS implementation** and TOM transition, **investment accounting** transformation (IFRS 9/ French GAAP / S2), securities data migration and security master design, investment data platform design, custodian coordination (CACEIS), STP architecture, closing process redesign, AI-driven control frameworks.
- **Fully bilingual EN/FR**. Open to remote assignments in EMEA, North America and APAC.

INVESTMENT PLATFORM EXPERTISE

- **SimCorp Dimension** — Lead Business Owner (CNP Assurances, €350bn AUM, 4.5 years) + Implementation PM (SCOR Investment Partners, €20bn AUM, 3.5 years) — functional design, accounting entries, controls, Solvency II reporting, data migration, UAT, go-live
- **Clearwater Analytics** — Senior Programme Manager — CW CORE (portfolio analytics), OMS/Jump (order management), LPx (private equity) — €11bn AUM, multi-custodian, Bloomberg integrations, STP architecture, AI-driven controls, Solvency II reporting
- **Bloomberg** — TSOX (order management), Bloomberg Data License — integration design and testing (SimCorp + Clearwater contexts)
- **SAP S/4HANA** — Automated investment accounting interfaces and SAP→SAP BFC reporting chain design (Coface Group Finance)
- **SAS** — Shared investment data platform design — data sourcing, data model, quality controls, management reporting; ECL (IFRS 9) model implementation and post-production ownership (Coface)
- **Other** — CODA (GL integration), CACEIS (custodian coordination, operational interface design), Neoxam GP3/GP4 (custodian platform), Linedata Chorus (legacy migration context — replaced twice)

PROFESSIONAL EXPERIENCE

Clearwater Analytics · Nov 2024 – Apr 2026 (18 months)

Senior Programme Manager — Cloud-Native Investment Platform & Finance Automation

- Led end-to-end delivery of a **Clearwater Analytics SaaS** platform for a French reinsurer (**€11bn AUM**: fixed income, TCN, listed funds, closed-end funds), replacing a legacy **Linedata Chorus** system — the second complete Chorus replacement in this career (first: Chorus → SimCorp Dimension at SCOR IP, 2008–2012).
- Delivered full **straight-through processing (STP)** across the investment value chain: order management → accounting production → Solvency II regulatory reporting — eliminating manual re-entry across Front Office, Middle Office, Back Office and IT.
- Automated custodian and bank reconciliation: frequency increased from **weekly to daily**; deployed **AI-assisted tripartite reconciliation** (Front Office / Back Office / custodian) with automated discrepancy pre-diagnosis.
- Implemented **AI-powered control framework**: price-variation monitoring, input reception controls, and AI-driven automated processing of closed-end fund instructions (capital calls, monthly NAV valuations).
- Reduced closing cycle from **D+4 to D+2** through end-to-end process automation and STP architecture.
- Multi-module implementation: CW CORE (portfolio analytics), OMS/Jump (order management), LPx (private equity); integrations to Bloomberg TSOX, Bloomberg Data License, CODA (GL), Solvency II reporting systems.
- Programme governance: bilingual EN/FR C-suite Sponsor Committees (monthly), RAID log (10+ critical risks); steered OMS module go-live (Dec 2025) and CORE module go-live (April 2026).

CNP Assurances · May 2013 – May 2018 (5 years)

Lead Business Owner — SimCorp Dimension / Head of Financial Production & Solvency II

- Acted as Lead Business Owner for **SimCorp Dimension** implementation at one of France's largest life insurers — covering **~€350bn in investment assets**, one of the largest SimCorp implementations in Europe — covering full ABOR and Solvency II reporting chain.
- Drove the entire business workstream: functional design, accounting entries (unit-linked, fixed income, equities), controls, Solvency II reporting architecture, testing, data migration and go-live readiness.
- Head of Financial Production & Solvency II Unit (May–Dec 2013): managed 5-person team. Significantly enhanced the **P&L Forecast model** — introduced bond reinvestment assumptions (duration/rate), inflation modelling for index-linked bonds, equity return assumptions; extended forecast perimeter to private equity, real estate and land assets. Initiated migration roadmap from legacy **Access** tools toward **SAS** (calculation engine) and **QlikView** (management dashboards).
- Supported Fast Close initiative; SME on accounting workstreams: cut-off, unit-linked portfolios, accounting/management reconciliation.

Coface Group — Group Finance · May 2017 – May 2018 + Jan 2020 – Oct 2024 (5 years)

Group Head of Investment Accounting / IFRS 9 Senior Project Manager – Implementation & Delivery

Group Head of Investment Accounting (Jan 2023 – Oct 2024)

- Led investment accounting function for a **~€3bn group investment portfolio** outsourced to CACEIS (Neoxam GP3/GP4 platform), overseeing **~20 international entities**.
- Industrialised the **Record-to-Report process** through a multi-tool automation programme: **Power Query** workflows for monthly CACEIS data (accounting/management reconciliation, SAP/CACEIS reconciliation, FX analysis, price-variation controls); **VBA macros** for GP3→SAP YFI format conversion (2 dedicated funds); **SAP FC Publisher** automation for BFC consolidation queries across all entities.
- Automated SAP S/4HANA investment interfaces and SAP→SAP BFC reporting chain, reducing closing timeline from **D+5 to D+3** and significantly cutting manual workload across group entities.
- Delivered a consolidated **Power BI** investment dashboard for CXO-level reporting, replacing manual reporting processes.

IFRS 9 Senior Project Manager – Implementation & Delivery (Jan 2020 – Dec 2022)

- Led Finance workstreams for Coface's IFRS 9 implementation — investment accounting, ECL provisioning model, data migration and close process redesign.
- Designed the **ECL (Expected Credit Loss) model** end-to-end: methodology based on external risk matrices, implemented in **SAS**, Finance as sole owner. Established monthly variance analysis in post-production. Oversaw UAT and proof-of-concept phases.
- Validated transition accounting schemes; redesigned close calendar under IFRS 9; developed automated control tools.

First assignment (May 2017 – May 2018)

- Head of Technical Accounting — investment accounting production, regulatory reporting, operating model redesign.
- Designed a shared **investment data platform in SAS**, covering data sourcing, data model architecture, quality controls, data governance and management reporting; the platform served as the backbone for all subsequent investment analytics work, including the IFRS 9 ECL model deployed in 2020.

Primexis — CFO Advisory / SCOR Investment Partners · Oct 2008 – Apr 2013 (4.5 years)

Associate Director — Insurance Practice / SimCorp PM at SCOR Investment Partners

- Concurrent SimCorp Dimension Senior Project Manager – Implementation & Delivery at SCOR Investment Partners (Nov 2008 – May 2012, 3.5 years): led migration from **Linedata Chorus** (MO/BO/accounting) to **SimCorp Dimension** across Head Office and foreign entities — **€20bn AUM**, 12-person team. Bloomberg maintained as FO system with full SimCorp integration.
- Designed and implemented **look-through automation** for dedicated UCITS funds: automated underlying asset consolidation, sensitivity calculations and Solvency II transposition — eliminating manual restatement processes.
- Managed US portfolio migration including structured products; defined AMF-compliant investment reporting and branch restructuring for foreign subsidiaries.
- As Associate Director at Primexis: built a **20-consultant Insurance practice** generating **€3m annual revenue** across 10 clients. Served on Executive Committee.

SCOR — Investment Department · Oct 2005 – Sep 2008 (3 years)

Head of Transformation Projects / Head of Group Consolidation

- Advised Investment COO; led transformation of SCOR's investment department into a standalone AM structure — replacing a fragmented **Bloomberg (FO) + Linedata Chorus (MO/BO/accounting)** environment with a fully integrated front-to-accounting platform.
- Led RFI/RFP for investment platform and performance attribution tool; managed **SimCorp Dimension** selection and implementation governance. Project budget: **€3m/year**.
- Head of Group Consolidation & Accounting Standards (Oct 2005 – Jul 2006): quarterly IFRS and annual US GAAP consolidated reporting; Group accounting policy definition; team of 5.

Coface — Group Finance · May 2004 – Oct 2005 (18 months)

Head of Technical Accounting and Reserving

- Designed and implemented **Bornhuetter-Ferguson stochastic reserving methodology** — replacing manual estimation with a structured quantitative model. Coordinated accounting, actuarial and operational stakeholders; accelerated close process.
- Investment accounting, technical insurance accounting; intercompany reconciliations; Group Finance coordination.

Mazars · Sep 1999 – May 2004 (5 years)

Audit Manager — Insurance & Reinsurance Practice

- Statutory audit, internal control reviews, due diligence and transaction support for insurers and reinsurers.
- Investment function reviews; financial control and forecasting work.
