Dear Hiring Manager,

I bring 25 years in insurance and finance with a proven track record piloting complex, multi-stakeholder transformations—exactly what your Luxembourg institution needs for this data modernization program.

My strength lies at the intersection of technical rigor, regulatory constraints, and organizational complexity. I've led similar initiatives: a €8M regulatory reporting overhaul for a pan-European insurer (18-month cycle, 40+ internal and external stakeholders, zero scope creep), and a process redesign spanning Finance, Actuariat, and IT that reduced month-end closing by 35%. In both cases, I designed the governance architecture, ran the steering committees, and arbitrated the blockers that emerge when institutional and technical priorities collide.

I work with structured methodologies—PRINCE2-equivalent frameworks—but adjust rigor based on context. Hybrid piloting (waterfall for governance cadence, agile for delivery sprints) is standard in my practice. Risk management isn't an afterthought; it's embedded in how I frame decisions and brief sponsors.

One real constraint: I've worked freelance for the past 18 months through my advisory practice. Your role reads as a senior IC position. If you're open to a senior consultant or interim placement converting to permanent, I'm genuinely interested. If you require immediate CDI status, I understand the gap.

I'm available for a conversation at calendly.com/xrobitaille/30min.

Best regards,

Xavier Robitaille
