Re : Fund Operations Specialist (Backoffice - FA/CUS) - Limited to 24 months (f/m/d)

Overseeing fund accounting and custody providers across a European operating model while keeping SLAs, KPIs and escalation processes disciplined enough to survive an audit is exactly the kind of back-office challenge that rewards depth over generalist project management.

At CNP, I rebuilt the investment accounting production chain under Solvency II constraints on 350 billion euros of assets under management, delivering the new sub-ledger structure and control framework in 18 months, on schedule. That work meant negotiating directly with external providers on data formats and reconciliation timelines, then defending the resulting numbers to internal audit and the regulator, which maps closely to the provider oversight and governance work this role calls for. Separately, I led data migration and account clearing projects where the deliverable was reconciled, audit-ready documentation, not just a clean migration: UAT scripts, cleared suspense accounts, and OD entries built through VBA to close gaps between legacy and target systems. I've also sat on the other side of the table, moderating review boards between finance, actuarial and IT teams with genuinely different priorities, which is the same skill set needed to run provider review boards and negotiate service agreements without losing time to friction.

Hybrid work with cross-border teams is standard practice for me. At Clearwater, I ran projects remotely across time zones without any loss of rigor in reporting or handoffs.

Happy to walk through any of this on a call.
